

Transport Bag Mackie Powered Mixer

Reinforced carrying handles for one person transportation

Double zipper pulls for easy access

Polyweave bubble wrap for protection

Our Comment

At Bomber Bags we receive many comments about the attractiveness of our products. Our primary concerns are rugged materials, quality workmanship, functional design and user comfort. Producing a superior product using only the best materials is never inexpensive. Nevertheless, our products are very competitively priced and are excellent values.

Construction

On the outside main body of the bag we use UV resistant 600 denier polyester cloth with interwoven PVC laminate fabric that will not fade, is totally waterproof, mildew resistant and easy to clean. This fabric is incredibly durable with high abrasion resistance and tear strength. Polyester has proven to be more UV resistant and fade resistant than nylon. Polyester has PVC laminated into the cloth unlike coated nylon which have polyurethane coatings that peel off during use and washing. Two ergonomically correct reinforced tubing handles on the sides make for easy one-person transportation. Wraparound heavy duty double metal zipper pulls allow for full access to the main compartment. Strategically located 1 1/2" webbing facilitates consistent pull from all areas of the bag. The inside liner is made of 400 denier ripstop nylon to protect the beautiful finish on the cabinets and connections on the front.

Protection

For added protection and padding we use a polyweave, 400 micron UV stabilized bubble material dual-extruded onto a tear resistant woven polyethylene sheet. This combination of materials forms a strong, durable layer that maintains its composure for easy retrieval and storage of mixer. This additional barrier acts as an agent against weather and everyday use.. 12" x 21" x 13 1/2". Capacity 3402 cubic inches.- 3 lbs. 4 oz. - (Sold Single).
